

## Ebola

## The Blood

something loudless, invisible has infected your body  
can't recognized that your days are counted  
you think you got a cold  
but the next day you spit out your innards

your lungs are just a braddlin mud  
feasting from inside your body  
you cry bloodstained tears of the incredible  
pressure from your eyes

braincells rotting, fever burns - Ebola  
skin is bursting, everything hurts - Ebola  
the virus got ya, the virus kill ya - Ebola  
you're cursed to death with Ebola

you'll die a painful death and all  
who be with you get infected  
no way to escape  
the virus will survive!
