

Love Shot

The Blue Van

Call a doctor Check my pulse Something hit me like a cannonball
Ears are ringing But I feel no pain Just a sweet sensation running through my veins

You got me love shot, honey Right in the head Love shot, honey,
I'm a living dead Don't know if I should hide You got your target set Love shot, honey, pump me full of lead

Release me, give me all your steam Control me, like a love machine

Friendly fire from her bedroom eyes Gun for hire, she don't compromise
She'll be laughing as she takes her aim Honey baby, let the bullets rain

Release me, shake my tambourine Controle me, with your love machine

Release me, give me your vaccine Control me, give me all your steam
Yeah, just heal me with your love machine
