

# Friends of My World

## The Boys Next Door

On this side of the divided room the light grows thin  
My world trembles with the sounds of them  
They move through the night, they run like fugitives  
Escaping with only just their lives

You're friends of my world  
You're brides and grooms  
Much too soon  
You're friends of my world  
You pay as you go  
You're in my show

On this side of the divided room the light grows dim  
In next to no time we're all involved again  
And science takes another man  
Too frail and scared to know what has possessed him

You're friends of my world  
You're this and that  
Mud on the doormat  
You're friends of my world  
You came as you are  
You left in my car

Oh baby you are so divine  
Across the desert, across the line  
And the Sphinx that lies in Egypt's view  
That's a friend of my world too

A friend of my world too  
A friend of my world too  
A friend of my world too
