

# Nation On Fire

## The Bruisers

[Originally by Blitz]

It's summer time and the country's on the line  
The lads are on the streets and the riots doing fine  
Picking up the pieces after the night  
Picking up the pieces for another fight  
The bricks beat down in the boys in blue  
There's no escape they're coming for you  
The walls come crashing 'round your head  
It's war on the streets and they're running red

Police are running facing defeat  
Cities burning in the summer heat  
Police are running facing defeat  
Cities burning in the summer heat

The crowd is screaming you can hear all their cries  
There's no way to stop tear-gas clouds  
Police are running, facing defeat  
Tears are falling in the summer heat

Police are running facing defeat  
Cities burning in the summer heat  
Police are running facing defeat  
Cities burning in the summer heat

The bricks beat down in the boys in blue  
There's no escape, they're coming for you  
The walls come crashing 'round your head  
It's war on the streets and they're running red
