

First Met You

The Bunny the Bear

Well, you keep breathing with uncertainty
But still, I stay here
And I won't budge until your heart explodes
From all of your fears
Your eyes are glossed, I can't be trusted
I'm a menace, just a vice
And I can't sleep without a drink
Or walk away when there's a fight

I swear we'll pull through
Trust me like you did when I first touched, first met you
I swear we'll pull through
Trust me like you did when I first touched, first met you

I still can't forget how my heart stopped
When our bodies first touched
Now I can't lay
I still can't forget how my heart stopped
When our bodies first touched
Now I can't lay with you

I swear we'll pull through
Trust me like you did when I first touched, first met you
We'll pull through
Trust me like you did when I first touched, first met you
I swear we'll pull through
Trust me like you did when I first touched, first met you

I swear we'll pull through
I swear we'll pull through
First met you

I still can't forget how my heart stopped

First met you
I swear we'll pull through
I swear we'll pull through
First met you
