

Never Say Never

The Business

All the things that they say to you,
All the deeds that they do to you
All the blame they'll pin on you
Never let it get you down
Take 'em on when they pick on you
Stand alone and you'll pull on through
Be yourself and they won't beat you
Never let 'em get you down

No you never say never when you're near the edge of never
No you never say never when you're at the end of your tether
No you never say, never say, never say, never, no

Speak your mind and you won't go wrong
Take the lead don't you tag along
Stand up proud and you'll be strong
Never let them put you down
It's your turn so you have a say
Take 'em on if their in the way
Be yourself and you'll rule the day
Never let 'em get you down

No you never say never when you're near the edge of never
No you never say never when you're at the end of your tether
No you never say, never say, never say, never, no
