

# Lady Friend

The Byrds

Here it comes again, it's going to happen to me  
Here it comes, I should have learned to duck  
She's going to say, she's going away  
And I will have to live without her and survive

Here it comes, it looks just like the last wave I drowned in  
Here it comes and I'm so far from shore  
She's going to go and take her trinkets  
And I will have to live without her and survive

Here it comes again, the night is going to fall  
Here it comes, she's going to say goodbye  
She's going to go and leave only me  
And I will have to live without her and survive
