

Vegas Skies

The Cab

It's twelve o' clock and I need your attention
It's like the alcohol making my head spin
Your scent is the rum in the bottle
Keeping me hopeless 'til I wake tomorrow

And if tonight ever makes a difference
The way that I feel the way that I'll remember it
I'll take this down until the glass remains
Swallow the words that I was meant to say

It's a long drive back to Vegas skies
So I don't, I make one more wrong turn tonight so

Say goodnight our first goodbye
I've only got forever and forever is fine
Just take your time
We'll stop the clock together
And know that the timing was right

All of these guards they stand tall and defensive
Putting up walls around what was once innocent
It won't let me in but I'm stronger than that
Cause you stole my eyes and I'll never look back

Girl last night I forgot to mention
The way that I feel the way that I'll remember this
When we're this young we have nothing to lose
We just the clock to beat and a hand to choose

It's a long drive back to Vegas skies
So I don't, I make one more wrong turn tonight so

It's a long way down
Just fall into place and you'll fall into me
We'll make it out you'll see
