

## Drag On Forever

### The Cars

I felt the pressure and I passed it off  
I heard your glockenspiel pounding soft  
I climbed on top of you, you said get off  
Must this drag on forever

I tripped and stumbled in the dead of the night  
Flashing my endless stream of kryptonite  
I lit my brain with rainbow crystal lite  
Must this drag on forever

Then things go so quite  
Like I should not be here  
You said I had to try it  
Don't let me interfere  
Just get me out of here

Your waxy face is melting on your lap  
I sat there trying to crush a ginger snap  
Your scream was sounding like a thunderclap  
Must this drag on forever

Your coconut windows hid the light so well  
Your testimony put me in a spell  
You look so wasted that I could not tell  
Must this drag on forever

Then things go so quite  
Like I should not be here  
You said I had to try it  
Don't let me interfere  
Please help me out of here

Must this drag on forever  
Must this drag on forever  
Must this drag on forever  
Must this drag on forever
