

# All Night Loud

## The Cat Empire

Ever since I was 16  
I wished that spring would come to me  
And I wished that I could dance up on the isles  
Sweat rivers on a stage of steam  
I let my thoughts begin to dream  
I held my breath and ran into the wild

And each night a horizon grew  
In all of us or just a few  
Til morning's gold would make it disappear  
Yet somewhere in my treasured chest  
Is not forgot what must forget  
But that's a feeling for another year

And movement has a way like words  
You're there before the rhyme is heard  
And all that one can do is shape the ride  
The miles of a forgotten dream  
Are yours my love it's where we've been  
And maybe one day soon we will arrive

Playing all night loud  
Playing all night loud  
Sing it all night with me  
All night loud

And we went on a whirlwind trip  
The nights unwound the records flipped  
And stillness came like chaos in the lights  
And voices like devotion flew  
Across the sea from me to you  
In music that I still cannot describe

And there were ugly times it's true  
Some from me and some from you  
And devils have a way of digging down  
But a friend is not a friend for life  
Unless your life is worth the strife  
So hold on we'll be alright

Playing all night loud  
Playing all night loud  
Sing it all night with me  
All night loud

There's a speech that I know well  
Was told by Henry V I'll tell  
A version that relates to us not war  
'He who sheds his sweat with me  
Will be my friend eternally  
From this day to the ending of the world!'

No matter if we're young or old  
Or in the sun or in the cold  
I hope I can remember your bright eyes  
Cos I know you and you know me  
At least somehow mysteriously

So thank you my dear friends  
and that's goodnight

I'm much obliged  
I'm much obliged

So thank you my dear friends  
and that's goodnight

I'm much obliged  
I'm much obliged

So thank you my dear friends  
and that's good night
