

Turn down the gravity, this is all too heavy  
I'll show you how the ancients once travelled  
They used to call this a chevy  
Just before the continents sank, you could still go outside  
I was sitting on a hot off ramp  
She pulled up and asked me if I needed a ride  
Terra nova cain I need you again  
Deep space jam on an alien terrain  
Terra nova cain I need you again  
Some for the little boys who live down the lane  
I should have known there was something amiss  
She had unearthly eyes  
She had a way of sifting through your mind  
Like she'd done it to a million guys  
She said will you help with our research  
I said take me to your leader  
She put her foot down on the oscillation pedal  
She was a transdimensional speeder  
Terra nova cain I need you again  
Protect me from the meteor rain  
Terra nova cain I need you again  
Put your explosion probe right into my brain  
They brought me back after thousands of years  
I hadn't aged at all  
We used to float around her weightless bedroom  
That drove me right up the wall  
Terra nova cain I need you again  
You dropped me off and you've left me quite drained  
Terra nova cain I need you again  
Help me break these telekinetic chains
