

Walkers

The Color Morale

Feet don't feel the world turn
Take steps like days, one at a time
We all start with the same dreams
Don't die in your sleep

We all try to run from our problems
And straight to the answers
We all spend our time chasing grace
But not listening to "my own" faith
Without that faith we just decay

We are not useless

We are not useless, just used
And I see something in you I've gone through
Useless and used (We've been used)
This is what we're all going through

Hope never loses us, hope never loses us
Hope never loses us, hope never loses us

We are not useless

We are not useless, just used (We've been used)
And I see something in you I've gone through too
Useless and used
This is what we're all going through

You'll never know that it grows
Grows inside
Until you reach inside and force it out
Will we ever make our demons leave
So we can learn in peace
We've all got it buried underneath

Hope never loses us, hope never loses us

They say that home is where the heart is
It's only yours to part with
We all have to find our way home
They say that home is where the heart is
You made me a home

We won't feel the world turn
If we keep standing still
