## **Fix This**

## **The Colourist**

I tried so hard Keeping up, keeping my head up For what I thought was so right Guess I'm not right always And I thought love was a fight You could tear each other down Then come back to life Guess I don't live always Your set backs add up I was wrong about us Don't slam that door shut, just yet. Hear me out I wont sleep tonight You wont leave this house See you shaking but you wont let it out We can make this right I wont leave this house I will fix this somehow I tried so hard Lift your lie And I never showed you my cold feet, just my pride Guess it killed you always But I see light in your eyes Even though I don't know how you can up the fight Guess I cant win always Your set backs add up I was wrong about us Don't turn and walk out just yet Hear me out I wont sleep tonight You wont leave this house See you shaking but you wont let it out We can make this right I wont leave this house I will fix this somehow I will fix this somehow And you wont say And you wont say And you wont say we're done And you wont say we're done I won't let this go on I wont let this go And you wont say we're done And you wont say we're done I wont let this go on I wont let this go Hear me out I wont sleep tonight You wont leave this house

See you shaking but you wont let it out We can make this right I wont leave this house I will fix this somehow

Hear me out I wont sleep tonight You wont leave this house See you shaking but you wont let it out We can make this right I wont leave this house I will fix this somehow

I will fix this somehow I will fix this somehow
