

Where Do I Go with Me

The Common Linnets

I could give it up and leave you any given moment in time
if I should walk away this evening, see if I can get you off my
mind
if I should bring my promises an answer to a feeling just to se
e
it would leave me with one question lord
where do I go with me

I will follow all the little signs and whispers from your dark
and tender touch
I will drink the water from your well I guess, and it could dro
wn me just as much
and you could be a memory and I could dream of all that I could
be
it ain't hard to figure out my love
where do I go with me

Where do I go with me
is there a place for me to fall apart
you got me down on my knees
where do I go with me

Where do I go with me
is there a place for me to fall apart
you got my down on my knees
where do I go with me

you got my down on my knees
where do I go with me
