## There's More to Love

## The Communards

There's more to love than boy meets girl There's more to love than boy meets girl. For love is strange and uncontrolled It can happen to anyone There's more to love than boy meets girl. I would like to shout it from the highest mountain To tell the world I've found love and what it means to me. But all around there's violence and laws To make me think again Maybe one day they will understand. There's more to love than boy meets girl I saw your face It caught the light Infatuation swirls inside My every thought for days was only you. So I'li climb that mountain and shout it loud I'll never let them bring me down And one day they will have to understand. There's more to love than boy meets girl. (9 x)
