Something Inside of Me

Something inside of me Feels like I've been wanting you forever There'll never be another century There's no time to think about the weather

When there's something inside of me Something inside of me Something inside of me And now I can't look back

The invisible invasion It's like a stranger strangled on the moor Into the void for now I'm gone Five in the morning I'll be knocking at your door

With something inside of me Something inside of me Something inside of me And now I can't look back

Oh please don't cut me loose I know you think that I'm bullet-proof Can't you see that it's hurting me What do think I'm supposed to be when

There's something inside of me Feels like I've been wanting you forever There'll never be another century There's no time to think about the weather

When there's something inside of me There's something inside of me Something inside of me And now I can't look back **The Coral**
