

## Get What's Coming

### The Creepshow

Thought it was over but its only just begun  
Got our heads in a spin once again  
Thought they were gone but its turns out we were wrong  
They don't know that were planning our revenge  
Trying to hide but got caught in our tracks  
Its not easy when your losing your mind  
With the dark eagle eyes they are watching all the time  
Till they lock us up and put out our lights

You'll spend a long time running  
Next time around we will put you in your place  
Your gonna get whats coming  
Best be watching your back everyday  
For eternity!

This is our nightmare being knocked out again  
Feeling weak it ain't fair, so to speak  
Just keep on trying to put up a fight  
But you'll land in a pile of defeat  
"Its all the truth" we explained in that room  
But no one would ever believe  
If you separate all of the truth from the lies  
Then it turns out they all could be right

You'll spend a long time running  
Next time around we will put you in your place  
Your gonna get whats coming  
Best be watching your back everyday  
For eternity!

Been running, still running  
Your gonna get whats coming  
Been running, still running  
Your gonna get whats coming now

You'll spend a long time running  
Next time around we will put you in your place  
Your gonna get whats coming  
Best be watching your back everyday  
For eternity!
