

Last Chance

The Creepshow

You broke your last chance
To make it happen
You keep on falling behind
You look so sorry through my eyes
Well you've been pushing
More than you should've been
You've given up for the last time
Fooled so many with your lies

Your dust is clouding up in sight
(up in sight)
Seemed like a darker road with time
(road with time)
Can't always see
But I hear all the victims cry
Just watched you die another time

The time is coming
So done with running
To face the truth
And realize well it ain't working
Been given chances
So many chances
You've given up for the last time
Now take a breath
And close your eyes

Your dust is clouding up in sight
(up in sight)
Seemed like a darker road with time
(road with time)
Can't always see
But I hear all the victims cry
Just watched you die another time

Should have seen it coming
From the moment you let go
And thought there would be nothing left to lose
Watched it all go down
See it's burning now
And there ain't no one to blame but you

Your dust is clouding up in sight
(up in sight)
Seemed like a darker road with time
(road with time)
Can't always see
But I hear all the victims cry
Just watched you die another time
Just watched you die another time
