

# Final Destination

## The Cross

(Roger Taylor)

Maybe it's just a feeling, every time we meet  
But you hit me right out of the blue from all those people out  
on the streets  
And if one time you told me that you loved me - heaven knows  
I would feel that I could ski right off the bridge of your pretty nose  
This could be my destination  
This could be my destination

And if one time you told me that you cared for me  
You would renovate my soul

This could be my destination  
This could be my destination  
Play some guitar now

You could be my  
You might be my  
You must be my  
Final destination

This could be my destination  
You must be my destination  
Know what I mean  
In the day time  
In the night time  
In the summertime  
In the wintertime  
About any time  
For all time  
Say you'll be mine  
Say you'll be mine  
Say you'll be mine  
Till the end of time
