

Now watch!

The grand deliverance opens up like cuts in the skin  
It'll show the roads and take you where  
you've never been returning and burning  
Feel the barriers explode from the barrel of aggression  
It's time to reload  
This organic ammo moves faster than these eyes can see  
Those bullets kill the distance in just as fast as speed can be  
Returning and burning  
Feel the barriers explode  
From the barrel of aggression  
It's time to reload  
Black - the ace of shades  
Strikes through the veins of the lame  
The face of the target is selfdestruction and its tongue speaks your name

Deliverance - The soul explodes  
Down on your knees you have some bullets to please  
The clips are full and there's a trigger to pull  
Down Down Down - And fill another round  
The conflict is you - You better take on this fight  
From the ballistic wombs, here comes your death in flight  
The more you grind your hate the sharper it'll get  
You've seen nothing yet  
Rising yet falling - The paradox in tribulation  
And the field turns bloodred as the colours of frustration  
Misanthropic hightime holds the rhythm to your rhyme  
But still the hesitation is magnetized to your spine

What will make you cross the line...?

Black - the ace of shades  
Strikes through the veins of the lame  
The face of the target is selfdestruction and it weaks your name  
Deliverance - The soul explodes  
Down on your knees you have some bullets to please  
The clips are full and there's a trigger to pull  
Down Down Down - And fill another round  
And so the grand deliverance opens up like cuts in the skin  
Now you know it - You've always been here within

Deliverance - The soul explodes  
Down on your knees you have some bullets to please  
The clips are full and there's a trigger to pull  
Down Down Down  
And fill another round  
Deliverance - The soul explodes  
Down on your knees you have some bullets to please  
The clips are full and there's a trigger to pull  
Down Down Down - And fill another round

Lock, Stock, Deathstruck!
