Until the Light Takes Us

Exterminatin' angel With burnin' sword in hand Cast out these snakes these heathens A judgment made a sentence past

You're not gonna use us You're not gonna push us to the ground You're not gonna fool us You're not gonna turn us inside out

Your shallow beauty fadin' While only bones remain A blackest heart's procession No love to give you only take the light away

You're not gonna use us You're not gonna push us to the ground You're not gonna fool us You're not gonna turn us inside out

You're not gonna use us You're not gonna push us to the ground You're not gonna fool us You're not gonna smash our skulls and bones

Language is broken The path is ferocious Ascend to the highest Through canyons of fire Chaos surrounds us Who comes against us As above so below

Until the light takes us Save us The Cult
