## Halo

I never felt like this with anyone before You only have to smile and I'm dizzy You make the world go round A thousand times an hour Just touch my head And send me spinning

I never felt like this with anyone before You show me colours and I'm crying You hold my eyes in yours And open up the world I can't believe all this

I want to keep this feeling Deep inside of me I want you always in my heart You are everything

I never felt like this with anyone before You fill my head all full of rainbows And all the rainbows end Is every step you take Just to be with you forever

I want to keep this feeling Deep inside of me I want you always in my heart You are everything **The Cure**
