The Cure

Hello image Sing me a line from your favourite song Twist and turn But you're trapped in the light All the directions were wrong You'll fall in love with somebody else Tonight Help yourself But tell me the words Before you fade away You reveal all the secrets To remember the end And escape someday You'll fall in love with somebody else Again tonight Take a step You move in time

But it's always back ... The reasons are clear Your face is drawn And ready for the next attack
