

Before We Were Born

The dB's

I'm telling you right now
Nothing's gonna change a thing
Are you ready for the news
It's hidden in the words I sing
The chords I ring

And I've got a feeling that I knew you
Before we were born
Before we were born

I've got a feeling that I knew you
Before we were born
Before we were born

Wind whistles round your door
Lightning rolls across the night
I'll be there when you wake
To paint the blue back on the sky
And dry your eyes

And I've got a feeling that I knew you
Before we were born
Before we were born

I've got a feeling that I knew you
Before we were born
Before we were born

It's only a dream now, come on now
And I knew you
Before we were born
Before we were born

I've got a feeling that I knew you
Before we were born
Before we were born

I've got a feeling that I knew you
Before we were born
Before we were born

I've got a feeling that I knew you
Before we were born
Before we were born
