

# Drop Your Guns

The Delgados

Look at all the places we been, and look where we are  
Something is amiss here cause we never seem to get very far  
Now I got a feeling, a plan, some music to sing  
And I'm looking for the right words to convey the message we  
Bring

If you can hear it, mmm, I'm gettin' near it, if I can say it  
Drop your guns, and raise your hands in the air  
You're the one that started all the trouble out there

Grease me, I'm near you, blast me, I'm in your way  
You're the thing in a song, that really ought to be put away  
Now I got a feeling, a plan, some music to sing  
And I'm looking for the right words to convey the message we  
Bring

If you can hear it, I'm gettin' near it, if I can say it  
Drop your guns, and raise your hands in the air

Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air
