

## Where Did His Eye Go?

The Dickies

He used to be a star of the stage and screen  
but now he only sees half of everything  
a funny little man with straight black hair  
he lost it in an accident but he doesn't care

So, Where'd his eye go  
I don't know  
Where did his eye go  
I don't know  
But nothing can stop him now

I saw him last night on the telethon  
he's doing candyman with his glasses on  
and then I saw him sing what kind of fool am I  
he whipped off his glasses and I looked at his eye

But, Where'd his eye go  
I don't know  
Where did his eye go  
I don't know  
But nothing can stop him now

(Break)

We really love that boy  
he's brought us so much joy  
he even used to be a goy  
but things are different now  
and I'm still wonderin how  
He'll keep an eye out for me now and then  
but does he see in 3D  
Where did his eye go  
Is it lookin at me

He used to be a star of the stage and screen  
but now he only sees half of everything  
a funny little man with straight black hair  
he lost it in an accident but he doesn't care
