

# This Is a Business

The Dodos

Who are you?  
common dust,  
winds and calms,  
can't you hear that they came to us?

oh my god,  
giving up,  
washed out and folded  
and goal is to know where we are

when the season ends  
and the winter comes  
breaking backs to them  
is all we really are  
to the common truth  
or the common use  
when the pitch comes in  
then the warning comes

this is a business  
come on make a difference  
show us your instant  
money making engine  
we have the money  
and the people's trust  
we don't really need you  
but you need us  
this is a business  
this is the only way of life  
this is a business  
this is the only way of life

who are you?  
Scared to trust?  
Throwing bones  
at the stones, what you're mad about?

no idea,  
indubious,  
going in for the kill  
when you do think of us

when the season ends  
and the winter comes  
make elastic bands  
all really long  
to the common truth  
or the common use  
when the pitch comes in  
then the warning comes

this is a business  
come on make a difference  
show us your instant  
money making engine  
get up and believe  
you got to perceive you

takes someone to lead  
you got to agree too  
this is a business  
this is the only way of life  
this is a business  
this is the only way of life

this is a business  
come on make a difference  
show us your instant  
money making engine  
we have the money  
and the people's trust  
we don't really need you  
but you need us  
this is a business  
this is the only way of life  
this is a business  
this is the only way of life
