

Kiss My Friends

The Downtown Fiction

I walk out in a plastic rain coat
I'm looking like an american psycho
I wanna love you like crazy
I wanna call you baby

I'm listening to the awkward silence
From the girl with the painted eyelids
I wanna love you like crazy
I wanna call you maybe

Everyone wants to make a scene
And watch their face light up
On the TV screen

I get high
I get low
I wake up every night
I go out and kiss all my friends
And then start again

I get high
I get low
I wake up every night
I go out and kiss all my friends
And then start again

I get high

Purple lips the new apartment
B-Side in the glove compartment
I wanna love you like crazy
I wanna call you baby

The street calls when it's after midnight
It feels good and it's just too alright
I wanna love you like crazy
I wanna call you maybe

Everyone wants to make a move
You gotta get your fast
And they'll get theirs, too

I get high
I get low
I wake up every night
I go out and kiss all my friends
And then start again

I get high
I get low
I wake up every night
I go out and kiss all my friends
And then start again

I get high

I get high

I get low
I wake up every night
I go out and kiss all my friends
And then start again

I get high
I get low
I wake up every night
I go out and kiss all my friends
And then start again
