The Dream Academy

"All out", cried the boy and put the girl in danger Whose only weapon was to believe in love All out but don't say forever too late for re-arrangement He's already thinking of another face And she's drawing on the memory she can't erase

They're moving on

They're moving on Keep a moving it, yeah They're moving on

We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time

Now the weight of intention carried the motion And the damage was over done And was started as a bid for independence Has ended with a starting gun

And he's wishing that he never said, "All out", oh yes, he does But the words just get lost in space
And you know it's such a lonely place
When you realize you've lost that face
She's moving on, counter revolution has taken place

We're moving on

(We'll make it this time, I know we're gonna make it this time) Yeah, we're moving on

(We'll make it this time, I know we're gonna make it this time)

(We'll make it this time, I know we're gonna make it this time) Just keep moving on

When you realize you've lost that face You've lost that face, oh

We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time We'll make it this time, I know we're gonna make it this time

We'll make it this time, I know we're gonna make it this time
