

# Bring Us Your Infected

The Duskfall

Corroding is our iron will  
this nation's tears weakens us  
bloodied are these once strong hands  
the heartless acts and dreams getting crushed

Daylight won't show our true face  
get rid of a war, start a few more  
sacrifice is such a small word  
for what it truly withholds

Bring them out against their will  
infect them all and stay until  
their bodies twitch and start to bleed  
a ruthless act for none to see  
bring them out against their will  
fool them to the top of the hill  
infect them all and stay until  
there's only one more grave to fill

In a roaring blaze we go down  
a mark in history we like to believe  
to be tattooed in the chest of our reincarnations  
never forgotten in this whirlwind called life

Castaway and to be collected when we're dead and gone  
slow is the process  
like leaves rotting in the sun

Bring them out against their will  
infect them all and stay until  
their bodies twitch and start to bleed  
a ruthless act for none to see  
bring them out against their will  
fool them to the top of the hill  
infect them all and stay until  
there's only one more grave to fill

We can't hide anymore  
our fate is right there  
can't close our eyes no more  
got to take a grip of what's right here

Bring them out against their will  
infect them all and stay until  
their bodies twitch and start to bleed  
a ruthless act for none to see  
bring them out against their will  
fool them to the top of the hill  
infect them all and stay until  
there's only one more grave to fill
