

Baby Blue

The Early November

It's a faster, growing green
Flows through these leaves
I have, I try, I guess we'll be alright

Way to try, I got a line
For you from me, better nice
A beautiful, baby blue,
Sky that's looking up at you
Now watch it fade away

But it's okay
We'll come around
With nights like this are never ending
I try so hard to make this perfect
You and I somehow
We can't see eye to eye together
We always knew that you worked better

I know you want it all
And you got me
Sorry I never was everything you ever dreamed
But kept at bay, for just in case that day

But it's okay
We'll come around
With nights like this are never ending
I try so hard to make this perfect
You and I somehow
We can't see eye to eye together
We always knew that you worked better

I don't want you to love me anymore

With my bags packed and ready to go
And nothing's ever hurt so much for me
To let you go, than to let you go

My bags packed and ready to go
And nothing's ever hurt so much for me
To let you go, to let you go
