Close to You

The Early November

If I was close to you,
Like never before.
It's like a quantum jump,
Straight into your heart.
Now I would span across this universe,
Divide two separate worlds.
'Cause you're the only one
Who pulls me down to earth.

Is it the way that it is or just the space that I'm in
That's got me jumping straight into a black hole
To find a place I can live, where we can both coexist
You got me wondering will I burn or implode

It wasn't long ago,
You fell into my arms.
It was the distance closed,
That pulled us both apart.
Now I will do my best to make this work.
Play the other part
With a telescope
Find our beating hearts.

Is it the way that it is or just the space that I'm in
That's got me jumping straight into a black hole
To find a place I can live, where we can both coexist
You got me wondering will I burn or implode

Is it the way that it is,
That's got me jumping straight into a black hole
To find a place I can live, where we can both coexist
You got me wondering will I burn or implode

Send a shock wave through our atmosphere
Send a shock wave through our atmosphere

And will a telescope find our beating hearts.

Is it the way that it is or just the space that I'm in
That's got me jumping straight into a black hole
To find a place I can live, where we can both coexist
You got me wondering will I further implode

Is it the way that it is,
That's got me jumping straight into a black hole
To find a place I can live, where we can both coexist
You got me wondering will I burn or implode

You got me wondering will I burn or implode
