

## Come Back

The Early November

Looking in your eyes  
Praising every moment because you're my only light  
Reading through stares at your passion that bears me now  
Shedding no little tears  
The silence scares us more than leaving could

Come back  
Please don't leave me now  
I'll be all that you need in life  
Because I can't live without you and  
I know all that you need  
I can give you everything  
When you're so far you'll forget about me

Waiting by your side  
Knowing every moment is closer to your flight  
Upset with the past, but it's all that holds us now  
Believing no lies, telling each other we'll be fine forever

Come back  
Please don't leave me now  
I'll be all that you need in life  
Because I can't live without you and  
I know all that you need  
I can give you everything  
When you're so far you'll forget about me

But I'll wait  
I could never leave those beautiful eyes  
I know you're sorry  
I know what you must be going through  
And I feel sorry for you

But please don't leave me now (3x)
