

# Migrate Migraine

## The Eighties Matchbox B-Line Disaster

You live in the past, you live in the shadow cast  
Of living a lie, rather give up then try  
See the lie, look inside you by  
Telling the truth, while I'm here or die

I am the law, I am the breath you draw  
I am the law, I am the near and the far

Straight from the crash, tell by the way I smile  
Until you were born, we were in love for a while  
Live in the while, I live in the moon in the sky  
I am alive, so you can feel you and I

I am the law, I am the breath you draw  
I am the law, I am the near and the far  
I am the law, I am the laaaaaw  
I am the law, I am the breath you draw

At night I think of you, and when I dream I cry  
That we were human too, and we could speak out loud  
When you see me don't fear, I'm here to mirror you  
You show me what I am, this song as I recall  
And if you listen hard when I shout in your ears  
I tell you what it is, and how it's crystal clear  
You showed me everything, you had the perfect tool  
Now i haul in my ear, no doubt I am the law

I am the law, I am the breath you draw  
I am the law, I am the near and the far  
I am the law, I am the laaaaaw  
I am the law, I am the breath you draw

At night I think of you, and when I dream I cry  
That we were human too, and we could speak out loud  
When you see me don't fear, I'm here to mirror you  
You show me what I am, this song as I recall  
And if you listen hard when I haul in your ears  
I tell you what it is, and how it's crystal clear  
You showed me everything, you had the perfect tool  
Now i haul in my ear, no doubt I am the law

I am the law, I am the breath you draw  
I am the law, I am the near and the far  
I am the law, I am the laaaaaw  
I am the law, I am the breath you draw
