

# It Was Love

## The Elected

You found a way to break away  
From the one you say that you love  
Now you cry out your eyes day and night  
You set free the one that you love

And it's true, I don't remember you  
But I believe you if you say that we met  
I get confused  
Nights, i've been wondering  
I thought I was already dead

But man, I loved  
Yeah, I loved  
When I loved  
It was love  
It was love  
Or at least, the closest I got

And the coffee, the cream  
The blood in my dreams  
Are the ones you used to know  
And the gas, the plane, the interstate  
Live the ones you don't have to know  
And I regret this sad and awful truth  
But my mouth, it'll get away from me  
You, I just put up with you, kid  
I stayed cause you wouldn't leave

Remember love  
Oh, love  
When we loved  
It was love  
It was love  
Or at least, as close as I've come

And maybe Joan was running all alone  
And there is a shortcut  
By putting a gun to your brain  
Man, to take all that you got

And the truth was I was just scared for you  
But for me, that's the way that it comes  
You'd gotten used to me and my awful tongue  
But god, didn't we have some fun?  
When we made love in the van  
And I drove with your hand on my lap  
And when San Diego got too unkind  
We just picked up and left it behind  
And we had some love and some hope  
A full tank of gas and a wide open road

It was love  
To us, it was all that we had  
And there's just a day when you just break  
The best thing you had  
And I still call it love  
For now, it's the closest I've come
