

## All These Governors

The Evens

(Generally I don't speak ill of the dead however I might make an exception in this case)

When things should work but don't work  
when things should work  
when things should work but don't work  
when things should  
when things should work but don't work that's the work of all these governors  
interference by decree that's the work of all these governors  
they block they block they block that's the work of all these governors  
when things should work but don't work that's the work of all these governors  
he pulls it up the air with your information panels that form the southern combination  
shut up shut up shut up shut up shut up shut up  
annually receive and a cup on every corner hand out rewards for snitching on a former  
shut up shut up shut up shut up  
when things should work but don't work that's the work of all these governors  
when things should work but don't work that's the work of all these governors  
they're always looking after me  
that's the work of all these governors  
they walk but never for the distance  
that's the work of all these governors  
when things should work but don't work that's the work of all these governors  
that's the work of all these governors  
while we're down on all fours let's scratch their names into the floor  
so we won't wait we won't wait for all these governors  
so we won't wait we won't wait for all these governors  
so we won't wait we can't wait for all you governors
