Die For You

The Expendables

I'm never so sure of anything at all But one thing I can count on A friend is good when Your backs against the wall And I've know them for so long If I never saw the light of tomorrow I would hold no regrets I wouldn't want any sadness or sorrow This is as good as it gets I live for you, you live for me You know I'd die for you And I know you do the same After all that we've been through In life's messed up games If I never breathed again I wouldn't change a thing You know I die for you And I know you feel the same All thoughs times that I Knew that I was wrong And the worlds pushing me down And all the times that thought I cant go on They picked me off of the cold ground I can't explain what they all mean to me To them I'm in debt Its not just friend it's a family And that you can not forget I live for you, you live for me I'm thankful and grateful In this life that I'm able To find a family other than my own And to get through this life

And not to do it on my own And if I never breath again I wouldn't change a thing

You know I live for you
