

## The Cam Song

## The Expendables

I can't believe that this  
Actually went down  
So foolishly I would sit aside  
Hoping you'd come around  
So I stand in my place  
With a strong poker face  
Mending my own mind  
No thinking things would  
Slip from our grip  
Not looking at the signs  
I've got nothing left to say  
But where was I when all this changed  
It happened so quickly  
I swear it was meant to be  
But when you look at reality  
You're gone and  
I'm trying to stay standing  
You put air on this fire  
And now we're really burning  
You know how we work  
We just keep on learning  
It's never whose best or who's worst  
Who comes up with ideas last or first  
At times I feel so empty inside  
You still stand with your pride  
Who saw it coming?  
Who saw it coming?  
Who saw it coming?  
But couldn't stand up to face it all  
Who saw it coming?  
Standing up to make the call
