

# Venus

## The Feelers

Come my little venus  
Can't you feel, it's in all of us  
Like the light, we see you soon give up yourself  
And dive into the moon  
And I don't mind being with you  
Knowing I'm by myself  
There's a river in all of us that's dry  
As you are in me  
There's a river in all of us that's dry  
As you are in me

Come my little venus  
Wrapped in shadows, yeah you're one of us  
And I hear the footsteps inside your head  
Walking, trying to find yourself  
I found myself in you  
Let me in, let me breathe  
Yeah I found myself in you  
Oh you

So come my little venus  
Come my little venus  
Come my little venus  
Come my little venus

You scream in silence  
But I can hear you  
You scream in silence  
But I can hear you  
You scream in silence  
But I can hear you

Well come my little venus  
Can't you feel, it's in all of us  
Like the light, we see you soon give up ourselves  
And dive into your room  
And dive into your room

And come my little venus  
Come my little venus  
Come my little venus  
Come my little venus  
And come my little venus  
Come my little venus

Come my little venus  
Can't you feel, can't you feel  
Now you're one of us  
Like the light, we'll see you soon give up ourselves  
And dive into your room  
And I don't mind, I don't mind

Come my little venus, venus, venus  
Come my little, oh my venus  
My venus, my venus, my venus, my venus  
And come my little venus
