Way Down

The Feelies

Every time I start to wonder why Then I see the look that's in your eye Feel old I am out contagion shows Looking back tomorrow only knows

Going down Way down Heading down Way down

When you find the peace is not your phone Take a look around and see the bone Try to find the way to take control Now it's time before it takes its toll

Going down Way down Heading down Way down

Going down Way down Heading down Way down
