We Can Dance

The Feeling

If you want, we can dance But I aint gonna sit and hold hands If you want, we can dance But I don't know a thing of romance

If you want, we can sing Baby, fear is a terrible thing If you want, we can sing Sing it loud like a telephone ring

And I said, "Oh, my baby. I am what you made me."

So while all the kids down in hell all party All the saints up in heaven drink tea While a dream is anothers romance All the fools on the planet (All the fools on the planet) All the fools on the planet Like me on the planet

Just dance

If you want, we can laugh How I wish I could open my heart So I sing, take a chance Take my first step to freedom and dance

And I said, "Oh, my baby. I am what you made me."

So while all the kids down in hell all party All the saints up in heaven drink tea And the hopefuls and poets likely Are singing "How did this happen to me?" While a dream is anothers romance All the fools on the planet (All the fools on the planet) All the fools on the planet Like me on the planet Just dance
