

# Munich

The Fray

Take all you know  
And you let it go  
Inside the snow  
Begins to fall

Step to the edge  
You and I  
And we fall below  
Take a breath  
Hold my hand  
And now you're not alone

Girl you know  
It terrifies me  
And I don't know why  
There you go  
You paralyze me  
And I don't know why

Everything  
Is black and white and grey  
Walls are shaking  
When you're touching me  
Changes everything  
When you're close to me

Back to back  
Hand to hand  
Face to face again  
Lovers and enemies  
Then we're back to friends

Something left  
Holding us  
Pulls me closer in  
Take a breath  
And the color will return again

Girl you know  
It terrifies me  
And I don't know why  
There you go  
You paralyze me  
And I don't know why

Everything  
Is black and white and grey  
Walls are shaking  
When you're touching me  
Changes everything  
Changes everything

Walls are shaking  
Changes everything  
When you're close to me
