

Plastic Flowers

The Front Bottoms

Should I go in it's been an hour
I give a fake name and hang in the emergency room
They say the good thing plastic flowers is
You can spray them with any type of perfume

You should fear what you already know
And hope that you never find out
About the things you don't know yet
'cause I believe that someone's got a plan for me
Got a plan for me even if I don't know it yet
Not quite yet

You should fear a hurt that's hard to explain
And hope that the next couple days to come
Are as relaxing as any other day
I hope your quarters go to laundry
I hope your problems go away
Either buried underground or drifted off into space
What more can I say

Cause we are all eventually
Either the victims or the victim's family
The victim's family
The victim's family

Okay, everyone shut the fuck up a minute
I have something to say
Listen just because something burns bright
Doesn't mean it's going to burn forever
So all these people around you saying
you I've got so much further to go
It's going to get worse before it gets better
I don't know, I don't if that true
You know, Thanks so much for coming
On this next part let's all sing it together

I believe that someone's got a plan for me
They got a plan for me
Even if I don't know it yet

I believe that someone, somewhere's got a plan for me
They got a plan for me
Even if I don't know it yet

Cause we are all eventually
Either the victims or the victim's family
The victim's family
The victim's family
The victim's family
