

# Taking My Uzi To The Gym

## The Front Bottoms

You and me, we could never be  
Because I don't laugh at shit that I don't think is  
funny  
And you're so eager to please  
You get on your knees for any fucking asshole  
Who says he's all you need

And I'm sorry I have to take this approach  
The only thing that'd shut me up now:  
your hands around my throat

You and your friends feel free  
And you're way too cool for me  
And you do drugs now  
And all your problems run so deep  
And we were smoking in the basement  
At your best friend's brother's party  
And you love them because he treats you  
Like you know what the fuck you're talking about

And you and me, we could never take this approach  
The only thing that'd shut me up now:  
Your hands around my throat  
Swear I love you  
Until the very, very end.  
But there's a problem,  
(What's the problem?)  
You're in love with your boyfriend.

This is me officially giving up on you  
I've wasted too much time with stupid lies  
For this to ever become true  
And this is me officially giving up on you  
We've wasted too much time with stupid lies  
I'm getting shitfaced in your room.

I've got dreams where I bleed  
And I choke myself to sleep  
And I hear screams  
It's the secrets that you keep  
And I am learning that your secrets  
They really don't mean shit to anyone  
But you and your friends

And you and me, we could never take this approach  
The only thing that'd shut me up now:  
Your hands around my throat  
Swear I love you  
Until the very, very end.  
But what's the problem,  
(What's the problem?)  
You're in love with your boyfriend

And I will get on my elbows until all my fingers go  
numb  
And I refuse to take another breath 'till you change  
who you have become

And I will lean on my elbows until all my fingers go  
numb  
And I refuse to take another breath 'till you change  
who you have become  
And I will lean on my elbows until all my fingers go  
numb  
And I refuse to take another breath 'till you change  
who you have become
