

## Red Violins

### The Gaslight Anthem

There is no use to hallow  
No use to cry  
20 thousand curses came to visit me in the night

Blankets full of cold  
It's best to keep the devil far away from those I love  
There were red violins praying in my dreams  
One for me and 2 for me, and one for Jesus free  
And one I only reach to

And if you want it then you want it  
Everybody pays a price to be  
Then you fall and you fall in your knees  
I see you found a favourite one  
I have red violins  
Playin' in sleep

If you come to me  
They make loud strangers sound they call off a relief  
And look at all these people clappin' steady to the beat  
And ambulances are on the way to me

And if you want it then you want it  
Everybody pays a price to be  
Then you fall and you fall in your knees  
I see you strip on your feet  
I have red violins

You hear now in the distance  
You bought a light and still remains  
I see them coming out to feel the pain  
I have red violins,  
I have red violins

And if you want it then you want it  
Can't you see callin' at your feet?  
Then you fall and you fall in your knees  
Come on and get my disease  
Lay with red violins  
Play with my violins  
Play with red violins  
Play with violins  
With red violins, with red violins  
With red violins, with red violins  
With red violins
