

# She Loves You

## The Gaslight Anthem

On President Street,  
You'll find the sisters  
Praying over  
My city's heart  
While Union Avenue  
Turns to it's disciples  
Who feels the pressure heat coming on hard

And if all was well  
And your heart could find the words  
Would we be for better baby  
Would we be for worse  
And if there was a way  
To navigate your seas  
If tonight my true love  
Did belong to me

And Juliet she's just smoking by the window  
Saying stone cold  
"I believe in you Romeo"  
And the raindrops in the cars  
Keep on falling from off the bars  
Blocking out a good song  
Playing on the radio

And if all was well  
And your heart could find the words  
Would we be for better baby  
Would we be for worse  
And if there was a way  
To navigate your seas  
If tonight my true love  
(Did belong to me)

Well I've been down  
I've been out  
Had my head and my heart kicked around

I've been down  
I've been out  
Had my head and my heart kicked around

But in the quiet of the night  
Romeo's mind is burning  
From putting all of his blood  
Into them sermons

And If all was well  
And your heart could find the words  
Would we be for better baby  
Would we be for worse  
And if there was a way  
To navigate your seas  
If tonight my true love  
Did belong to me

(Do you miss her right now?) Did belong to me

(Do you miss her right now?) Did belong to me  
(Do you miss her right now?) Did belong to me  
(Do you miss her right now?) Did belong to me
