## **Paper Waves**

## **The Gathering**

Sun comes out - Wakes me up Wanna sleep, need to sleep

Saw your face - In my dreams Fade away, far away

Fade away, fade away

You took your time - Passing by Smiles and tears -No one cares

Had you once -Now you're gone Want you here, Need you near

Dreams and life it seems

Are crushing boundaries in me

Paper waves and seas - Ride the tide with me

Need to see - You're not far from me I'm breaking time -Crossing lines

I start to run -to catch the sun From falling down - and burn this town

I try to reach -You slip away Can't you stay - Please just stay

Cold and warmth collide Turning dark and light, inside Nights we over fly - All logic gone awry

To know we might not meet again, I hardly bare to look at you In all this mess we don't complain, we kind of always knew
