

All Brand New

The Generators

Oh me and you know what to do
It's all brand new now
What's left behind will stay behind
It seems what's best now
Another chances
Dance we dance
Its sure to get better
Whatever comes our way we'll crash into it together

Day by day
We'll go drifting this way
There's nothing more to say
But leave it in yesterday
It's all brand new now
I can't explain how
We saw the light and got
Right to the other side

With no traffic
We won't panic
We'll make it quick now
I remember the way
I can say though it's been a while now
The sun came out to shine
It's been some time since we've seen in
We walk in darkness
It seems we can never leave it

Day by day
We'll go drifting this way
There's nothing more to say
But leave it in yesterday
It's all brand new now
I can't explain how
We saw the light and got
Right to the other side
