

Transmitter

The Generators

Transmitter are you out there?
If you are don't answer
You spread the cancer
It's the gift that keeps giving

You get no reception
While you spread the infection
Will this become clear
That you're crowding up the atmosphere

Transmitter your bound
To make contact
When you do
It's gonna make an impact
When your world
And other worlds collide

Are you coming in over the airwaves?
What's the message
That you're trying to relay?
You have the power of life
And you hold it like a loaded gun

You poison everything you touch
Shit through the clouds
Never to return to us
It's clear that you're crowding up the atmosphere

Are you coming in over the airwaves?
What's the message
That you're trying to relay?
You have the power of life
And you hold it like a loaded gun

You knock 'em down
With a heavy hand
You shoot 'em down
With a one night stand
Transmitter you've gone
Off course
Who will bring you back?

This world you left behind
This departure of your design
Your destination is unknown

Are you coming in over the airwaves?
What's the message
That you're trying to relay?
You have the power of life
And you hold it like a loaded gun

Come in transmitter
