

# The People Tree

## The Gift Of Gab

With the N.A.S.A. team, we will take you bodily where  
no man has ever gone before.

We will take you back some fifteen billion years to the beginning of time.

Yo! From a drop of blood to bones and body parts  
To vital organs form and your brain and tiny heart  
Your fetus, date of birth, til puberty finally starts  
Adolescence, adult, then your elderly body rots  
It was devine decree that begun the plan  
But it's disease by the greed of the sons of man  
Who try to lead with their guns in hand  
Understand God's the one that command...

Did we climb out of the sea?  
Where did we come from you and me?  
Two legs to walk and eyes to see  
Am I the man I want to be?

People grow in my back yard  
In my garden, in my heart  
Pink and purple, red and blue  
On this sunny afternoon

Back before time was time and space was space  
The ever present I divine so laced with grace  
Decided it was time to try to chase the taste  
To what it was designed, now life is taking place  
Within it' self-divided, now it takes some space  
They can't be fathomed by a mind creates the state  
Of ego now what's is mine, is mine, ok now hate  
We'll reign until the blind have eyes and they awaken...

Planting the seeds in the ground  
How is my garden growing now?  
A tender kiss, a little smile  
The way a mother holds her child

Tasty little human beings  
I grow them on the people tree  
I will eat them one by one

If there's enough for everyone

Oh, unending ever flowing life beyond the birth  
Tell me what the purpose is for creating the earth  
Mainly we created the planet as man's habitat  
Be fruitful and multiply across the planet's back  
But why does hate exist, the war and AIDS and shit?  
It we're to be fruitful, why can't poor people pay they rent?  
Cause love and hate, both sides are conjoined  
Physical forms have to deal with both sides of the coin  
Why do we die?  
So you can live  
Why do we strive?  
So you can win  
But why do you defy every truthful word I recommend?  
My question back is: Why do you recommend then throw temptation in?

So I can test you patience and tolerance in the face of sin  
But why a test when you hold all the answers to the state we in?  
For you to bear witness to imperfections of mortal man  
So it's a lesson?  
And a blessing journey back to where you've been  
Cause before the tree can flourish, seeds must first be planted in!

People grow in my back yard  
In my garden, in my heart  
If you like my garden, you might like me  
Underneath the people tree

Getting closer to God!  
Getting closer to God!  
Call upon your God!  
Closer to God!  
He'll answer your question!  
Closer to God!  
God said I trust you!  
Behold!  
Who are you?  
I'm God muthaf\*\*ka and I'm not who you thought I was!  
They better be giving me all the respect  
All y'all, all y'all, all y'all, all y'all check yo self!  
Cause I'm God!  
Hello hello hello hello  
Feel me, feel me, feel me all you
